

## **491 REPORT 12**

*Date:* 1 / 21 / 2017  
*Group Number:* MAY1706  
*Project Title:* Pay it Forward  
*Client / Advisor:* Merry Rankin / Swamy Ponpandi

### *Team Members / Role:*

Christian Klein	(Key Concept Holder)
Evan Blackwell	(Team Leader)
Brody Concannon	(Team Webmaster)
Carter Thayer	(Architect)
Grace Winchip	(Team Communication Leader)

### **Period Summary**

Over the winter break, we worked on getting environments fully set up, connecting to the server, and getting the webpage created, deciding to use webforms. We found that more learning needed to be done for much further work and used break to catch up on some of that learning.

### **Past period accomplishments (please describe as what was done, by whom, when)**

Christian Klein: Created the initial Visual Studio project and set up initial website structure.

Evan Blackwell: Began creating a page for registration and continued familiarizing self with ASP.net, Visual Studio, and differences between C# and Java

Brody Concannon: Researched packages and Visual Studio built-in capabilities for unit tests.

Carter Thayer: Connected to the server and began work on getting the application running. Researched if it was possible to create a continuous integration build with Visual Studio Team Services.

Grace Winchip: Fiddled with the Microsoft SQL Server, got connected to our github repository in Visual Studio, and continued learning in C#

### **Pending issues (if applicable)**

Need access to database, most need to become familiar with the environment

**Individual contributions**

<b><u>Name</u></b>	<b><u>Individual Contributions</u></b>	<b><u>Hours this Period</u></b>	<b><u>Hours Cumulative</u></b>
Christian Klein	Created initial project and set up base website structure	4	18
Evan Blackwell	Began creating a page for registration and continued familiarizing self with ASP.net, Visual Studio, and differences between C# and Java	2	16
Brody Concannon	Researched packages and Visual Studio built-in capabilities for unit tests.	2	17
Carter Thayer	Connected to the server and began work on getting the application running. Researched if it was possible to create a continuous integration build with Visual Studio Team Services.	2	16
Grace Winchip	Fiddled with the Microsoft SQL Server, got connected to our github repository in Visual Studio, and continued learning in C#	2	16

**Comments and extended discussion**

N / A

**Summary of weekly advisor meeting (if applicable/optional)**
